

## ABOUT ME

I have a bachelor's degree in Computer Science and Software Engineering.

I choose this area since building software encourages creativity, communication, self-discipline, and I've always been a problem solver and a technophile who is fascinated by new gadgets and technology.

I'm searching for projects where I can put my skills and knowledge to good use while still having opportunity to learn, grow, and advance my career, mainly in web development and/or database systems.
